

Remotely Accessing Web Station for Physicians via Citrix

Remotely accessing WSP via Citrix eliminates the need to keep specific versions of Java on your non-McLaren computer. This also allows you to remotely view PACS images through WSP as well as perform sign-off in HPF.

1. Please go to <https://mhccitrixapps.mclaren.org/> and sign in with your McLaren username and password.

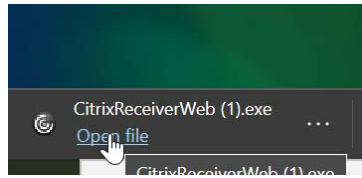

2. Click the box next to **I agree with the Citrix license agreement** and click **Install**.

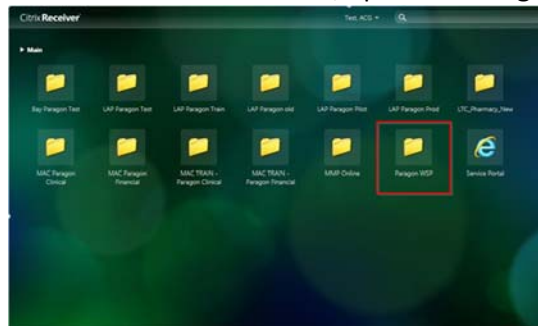

Note: if you have already installed the Citrix Receiver, please click Log On and skip to Step 6.

- The **Citrix Receiver** will download (this will display in the bottom left of the screen). Once the file is downloaded, click **Open file**.

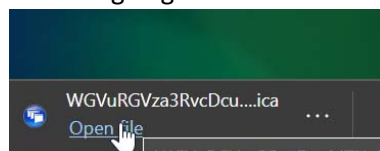

- Click **Start** to run the installation process.
- After the installation process is completed, please then click **Continue** within your web browser to be taken to the Citrix Storefront.
- This will take you to the Citrix StoreFront. From here, open the **Paragon WSP** folder.

- Select the **Paragon WSP** icon.

- Click **Open File** to launch the WSP Landing Page.

- This will load the Web Station for Physicians Landing Page.
