

## Post ICD-10 Implementation

### Documentation Tips

10/5	<p><b>Blood and Blood product Transfusion</b> – the vessel in which the blood or blood product was infused must be stated in order to code the infusion of blood and blood products; options would include-</p> <p>Peripheral vein via IV Central vein via CVC Central vein via PICC Central Artery * Peripheral Artery *</p> <p>When necessary refer to transfusion records for data.</p> <p>* Not commonly used but codes are available for the coders to choose from; this information will be needed to code any transfusion of blood or blood products.</p>
10/5	<p><b>OB/ GYN</b> – Peri-urethral laceration during delivery – This codes to trauma to perineum and vulva and the repair is coded to the vulva; if true urethral tear please state this along with repair.</p>
10/9	<p><b>Orthopedics- Type of Prosthesis Device</b></p> <p>Oxinium joint prosthesis should be considered a Synthetic substitute of Ceramic for documentation of the type of prosthesis device.</p>
